

## Verbindung mit dem WLAN herstellen

Auf die Mac WLAN-Verbindung mit dem Namen «gbw-auth» klicken

The image shows two overlapping windows from a Mac OS interface. On the left is the 'WLAN' settings panel, which lists several networks under 'Andere Netzwerke'. The network 'gbw-auth' is highlighted with a yellow background and a black arrow pointing to it. On the right is a connection dialog box for the 'gbw-auth' network. The dialog title is 'Das WLAN „gbw-auth“ benötigt firmenweite WPA2-Anmeldedaten.' It contains a 'Modus' dropdown set to 'Automatisch', a 'Benutzername' field with 'vorname.nachname', and a 'Passwort' field with masked characters. There are checkboxes for 'Passwort einblenden' (unchecked) and 'Dieses Netzwerk merken' (checked). At the bottom of the dialog are 'Abbrechen' and 'Verbinden' buttons. A black arrow points from the 'gbw-auth' network in the settings panel to the 'Verbinden' button in the dialog. Another black arrow points from the 'Verbinden' button down to the next dialog box.

The image shows a dialog box titled 'Zertifikat überprüfen'. It features a lock icon with a Wi-Fi symbol. The main text reads: 'Authentifizieren bei Netzwerk „gbw-auth“' followed by 'Bevor du dich bei dem Server „chgbw04.gbwezikon.ch“ identifizierst, solltest du dessen Zertifikat überprüfen, um seine Eignung für dieses Netzwerk sicherzustellen.' Below this, it says 'Klicke dazu auf „Zertifikat einblenden“.' At the bottom, there are three buttons: 'Zertifikat einblenden', 'Abbrechen', and 'Fortfahren'.

The image shows the 'WLAN' settings panel. The 'WLAN' toggle is turned on. Under the heading 'Bevorzugtes Netzwerk', the network 'gbw-auth' is listed with a Wi-Fi icon and a lock icon. Below this is the 'Andere Netzwerke' section with a right-pointing arrow icon. At the bottom, there is a link for 'Systemeinstellung „Netzwerk“ ...'.
